Docket No.: 200210152-1

Title: FLUID EJECTION DEVICE

RESPONSE TO RESTRICTION REQUIREMENTCommissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Election/Restriction

In the written Election/Restriction Requirement mailed August 25, 2006, the Examiner required restriction to one of the following species:

- I. Species I, relating to a substrate, fluid feed slot, firing resistors, and a reference conductor.
- II. Species II, relating to a substrate, fluid feed slot, firing resistors, a reference conductor, a vaporization chamber, and an isolation structure.
- III. Species III, relating to a substrate, fluid feed slot, firing resistors, a reference conductor conducting a first current, and first drive switches.
- IV. Species IV, relating to a substrate, fluid feed slot, firing resistors, a reference conductor conducting a first current.
- V. Species V, relating to a substrate, fluid feed slot, a vaporization chamber, and a reference conductor.

In response to the Election/Restriction Requirement, Applicant hereby elects Species III with traverse for prosecution on the merits. Applicant contends that the Examiner has not given a clear basis for the Election/Restriction Requirement and that the rationale for the different groupings has not been presented. Applicant notes, for example, that the groupings of Species I and Species IV both relate to a substrate, fluid feed slot, firing resistors, and a reference conductor and, as such, are not mutually exclusive. Thus, Applicant submits that the above Election/Restriction Requirement, at least between these groupings, is not proper.

With the election of Species III, Applicant submits that claims 1-20, 35, and 37-50 are readable on the elected species.

Response to Restriction Requirement
